TABLE

A very thick top, with clearly defined corners; The table maintains a great sense of balance through the contrast between the top and the base, almost creating the illusion of a suspended top.

A game of balances between elements, The inclination of the legs suggests dynamism and the linearity of the top provides great visual stability. Stationary or moving, the table really does have an unusual personality.

The ellipsoidal or circular shape and the four deep bevels characterize the top surface; the legs, in solid wood, support the top according to an organic logic of and concept continuity.

NIGHT

The Bed is equipped with a simple and intuitive system, which allows you to open a bed ready-to-use without moving anything from the shelf. The shelf is synchronized with the bed opening remaining horizontally to the floor. For this reason, it is not necessary to remove any objects. The furniture consists of a comfortable sofa, an extendable chaise longue, three shelves unit and a container placed behind the chaise longue. The fully removable sofa has a large container under the seats. .

KITCHEN

Warm, bold colour palette shades._

The tall cabinets in brushed metal effect lacquer integrate nicely into the space, and house appliances offering greater flexibility of space . The island is in matt lacquered grigio seta.

An essential design: a gloss white paraffin lacquer, synonymous with brilliance, redefines the relation between light-kitchen-living, and is elegantly combined with graphite oak wooden columns. The only connection between the two blocks is the detail of the integrated handle that enhances the balance of volumes.

LIGHT

The strong personality of light is mainly due to the magic atmosphere it creates in the room: depending on the corner you choose for this floor lamp, it gives a different lighting. The irregular shape of light creates a polyethylene vortex.

The generative process of Mesh begins from a single unit, unique and made in polyethylene: it could be replicated, to spread out the space. Every single unit consists of three crossed elements, which make the product modular, to create variable schemes for every kind of indoor spaces.
